

You are cordially invited to  
**How to be a Programmer, Support Professional or Systems Administrator!**

Partially supported by the National Science Foundation under  
Oklahoma's NSF EPSCoR Cyber Connectivity Grant

Contact: Ms. Sandy Kelso

Tuesday April 16, 2013

Time 1:05-3:50PM

Moore Norman Technology Center, IT building

### Meet Mic Buchanan

Mic has experience as a DBA since 2007 (Oracle Version 9i-11g), and has been doing PL/SQL Programming since 1997 (Oracle Version 7-11g). She has thorough knowledge of RDBMS technology in combination with High Available and Manageable Oracle Architecture environments. She is a seasoned PL/SQL Developer and has worked in a multitude of database environments including Pharmaceuticals, Telecommunications, Manufacturing, Education, HR and Financial Systems in both Public and Private sectors.

### Meet Gayathri Swaminathan

Gayathri is a Systems Engineer at OU-IT. She loves re-engineering exercises, building and integrating systems, scripting, performance tuning, and deep dive exercises. She has been working in technology for almost 13 years in several positions ranging from Windows Systems Administrator to Network Specialist to Programmer Analyst to UNIX/Linux System Administrator to Systems Engineer.

### Meet Lynnetta Eyachabbe

Lynnetta is our complete IT professional. She brings years of support expertise and enthusiasm to sustain solution deployments within OU-IT. She bridges collaborations and technical focuses constantly to assist with problem determination/troubleshooting while broadening and deepening technical expertise and experiences.
