A Day in the Life of a System Administrator

Presented by Elliott Robertson, Information Technology at The University of Oklahoma

What is it like to be an infrastructure administrator? What are the day to day challenges? Learn what you need to know to about system design, development, and operations. What is it like to work with large teams comprised of various roles? Prepare yourself to be a better job candidate by finding out what infrastructure teams look for in prospective employees. Come find out how to volunteer for open source projects, show off your coding skills, and where to look for systems engineering internships!

Elliott Robertson is responsible for the maintenance of systems and related infrastructure for Information Technology at The University of Oklahoma. As a graduate of the Electrical Engineering program, he enjoys implementing enterprise solutions, solving complex troubleshooting issues, and learning about emerging technologies.

Contact: Dr. Jicheng Fu
When: Tuesday, November 13, 2012, from 4:15 to 5:30
Where: Math and Computer Science Building, Room 111
