# Agenda

- **Overview for those new to Globus**
- **Survey of “recent” enhancements**
- **Brief demonstration**
- **Questions**

Globus delivers...

Big data transfer, sharing,  
publication, and discovery...

...directly from your own  
storage systems...

...via software-as-a-service

# Data management today

- **Move?**
- **Share?**
- **Discover?**
- **Reproduce?**

Another perspective...

# Campus Bridging

...within and beyond campus  
boundaries

# Bridge to national cyberinfrastructure

Move datasets to supercomputer,  
national facility

Move results to campus (...)

# Bridge to instruments

- Clear staging store
- Data cleansing
- Pre-processing
- ...

Analysis store

Raw Source Data

High durability,  
low cost store

# Bridge to your collaborators

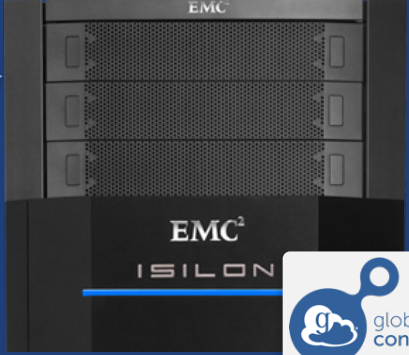

**XSEDE**  
Extreme Science and Engineering  
Discovery Environment

**EC2**

**Jetstream**

**NERSC**

## Local/Campus stores

## Cloud stores

**ceph** **openstack** **Jetstream**

**Google Drive** **amazon web services™ S3**

- Group management
- Share creation
- Permissions configuration

# Bridge to community/public

(Re)format...

- PDF/A
- HDF
- ...

Describe...

- Datacite metadata
- Domain metadata
- Provenance info
- ...

Replicated, public repositories

Multi-step curation workflow

- Review → Update → Resubmit cycle

Persistent identifier

- DOI

# Why use Globus?

- **Ease of use: consistent UI across systems**
- **“Fire-and-forget” file transfer**
- **Maximized WAN throughput**
- **Secure access w/multi-tier security model**
- **No/low-overhead external collaboration**
- **Rapid deployment w/standard packages**
- **Highly automatable: CLI, RESTful API**

# What's new?

- **New authentication service**
- **Endpoint search and bookmarks**
- **Management console**
- **Data publication and discovery**
- **Storage connectors**
- **Globus Platform-as-a-Service**

# Demonstration

Globus Connect...

Makes your storage  
system a Globus  
endpoint

# Globus Connect Personal

- **Installers do not require admin access**
- **Zero configuration; auto updating**
- **Handles NATs**

# Globus Connect Server

- **Enable access for all users with local accounts**
- **Create endpoint on practically any filesystem**
- **Native packages: RPMs and DEBs**

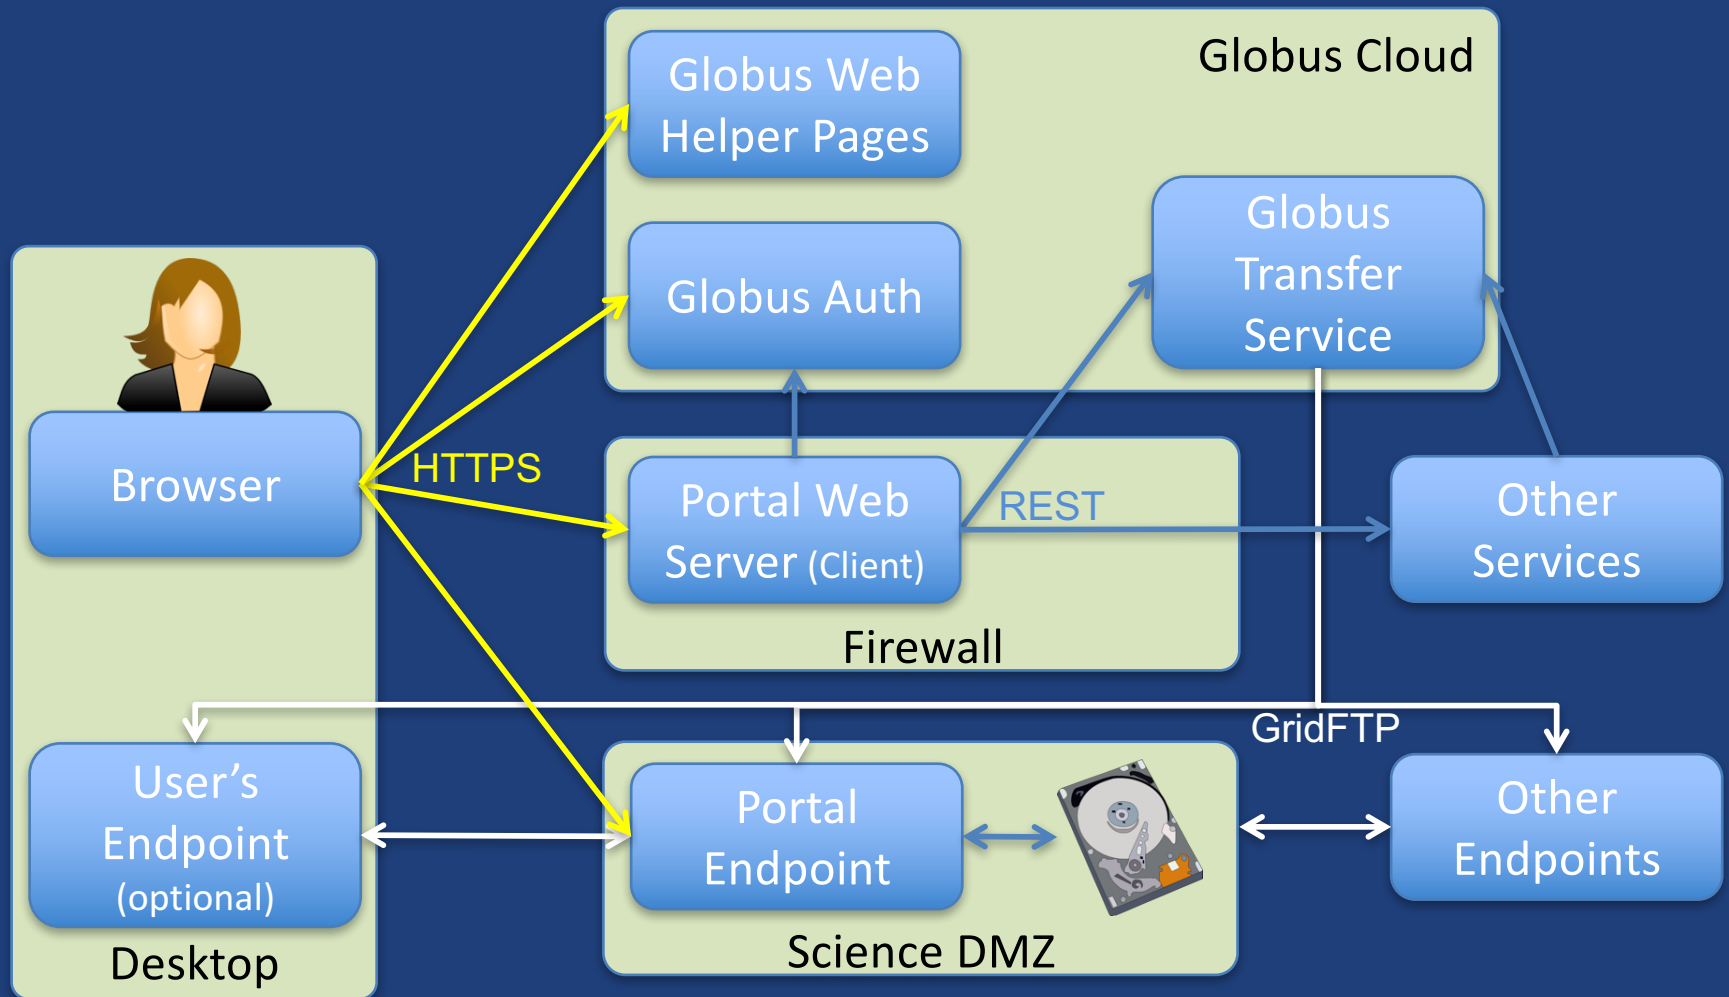

# Storage connectors

- **Standard storage connectors (Posix)**
  - Linux, Windows, MacOS
  - Lustre, GPFS, OrangeFS, etc.
- **Premium storage connectors**
  - HPSS
  - HDFS
  - S3
  - Ceph RadosGW (S3 API)
  - Spectra Logic BlackPearl
  - Google Drive (coming soon)

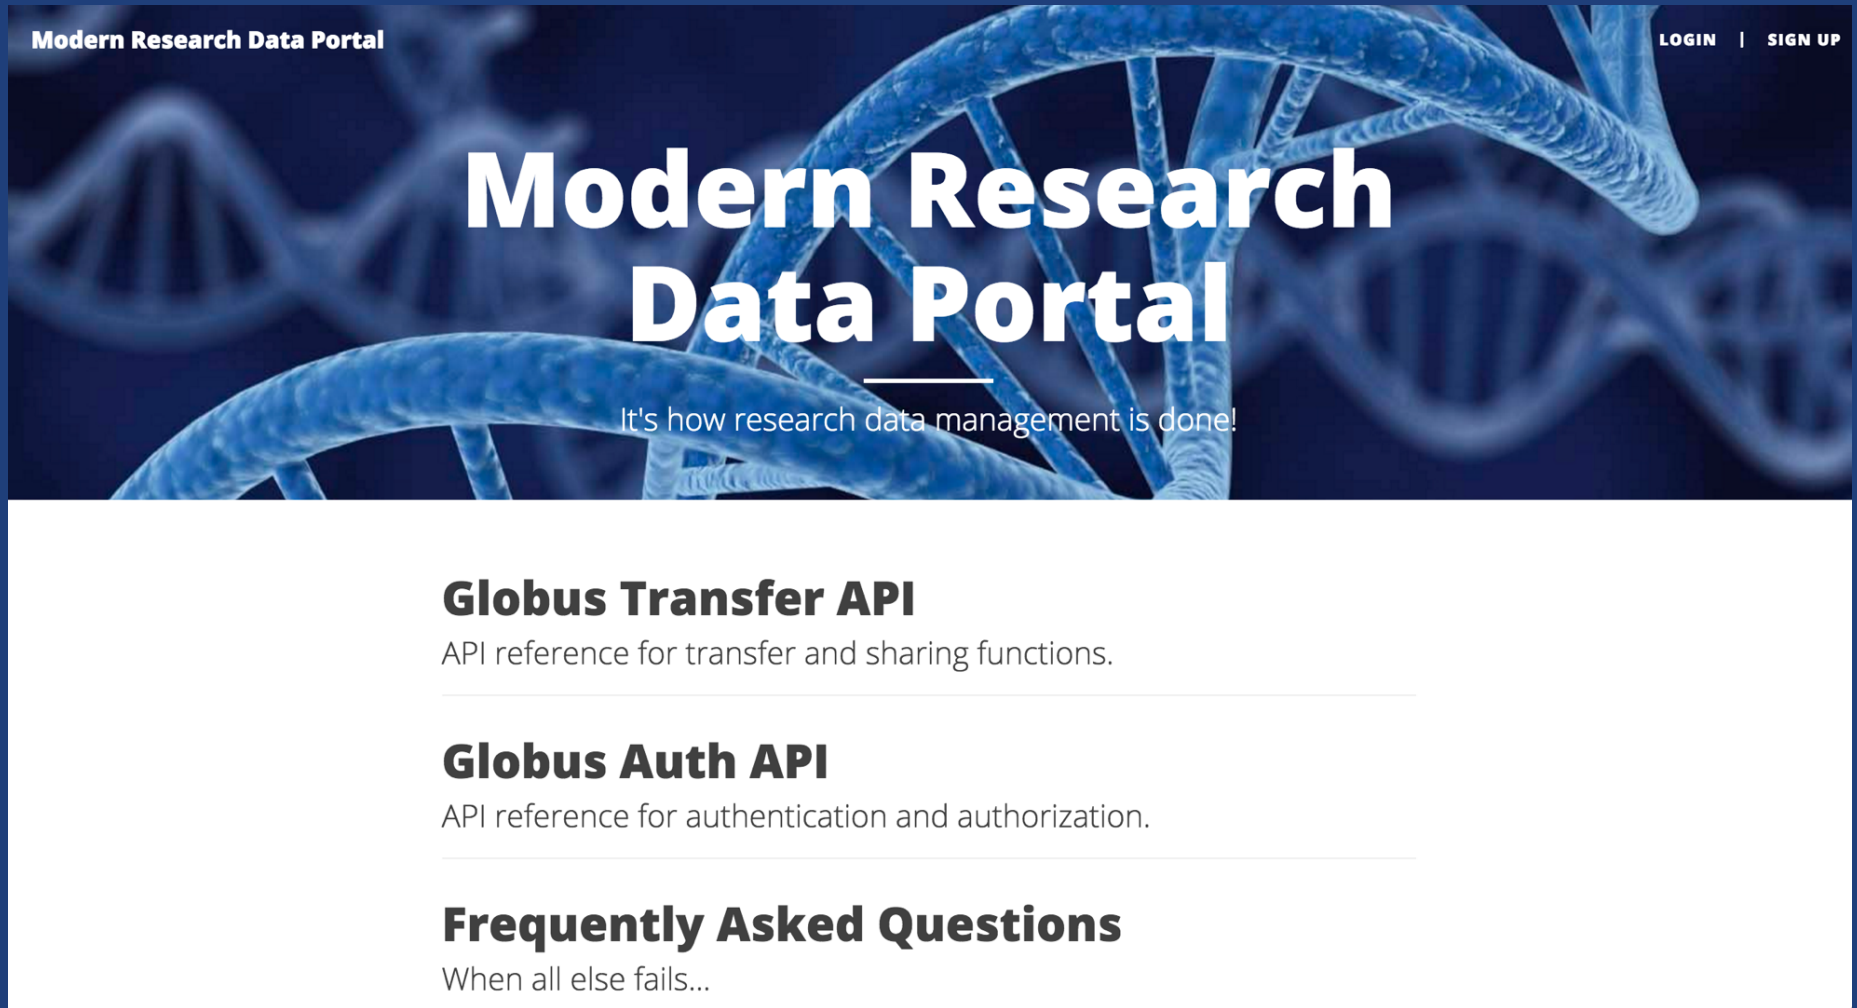

# Globus Platform-as-a-Service

- **Move portal storage into Science DMZ, with Globus endpoint**
- **Leave Portal Web server behind firewall**
- **Globus handles the security and data heavy lifting**

# Sample python data portal

Modern Research Data Portal

## Modern Research Data Portal

It's how research data management is done!

**Globus Transfer API**  
API reference for transfer and sharing functions.

**Globus Auth API**  
API reference for authentication and authorization.

**Frequently Asked Questions**  
When all else fails...

<https://github.com/globus/globus-sample-data-portal>

# Coming Soon

- **HTTPS support**
  - Synchronous alternative GridFTP
  - Implements same fine-grained access control model
  - Greatly simplifies sharing/transfer for “small” datasets
  - Supports standard browser behaviors such as viewing known file types in the browser
  - Allows integration with clients and web apps to further leverage existing research storage systems
- **New command line interface**
  - Locally installed Python client
  - Similar to AWS command line tools

# Globus Subscriptions

- **Standard Subscription**

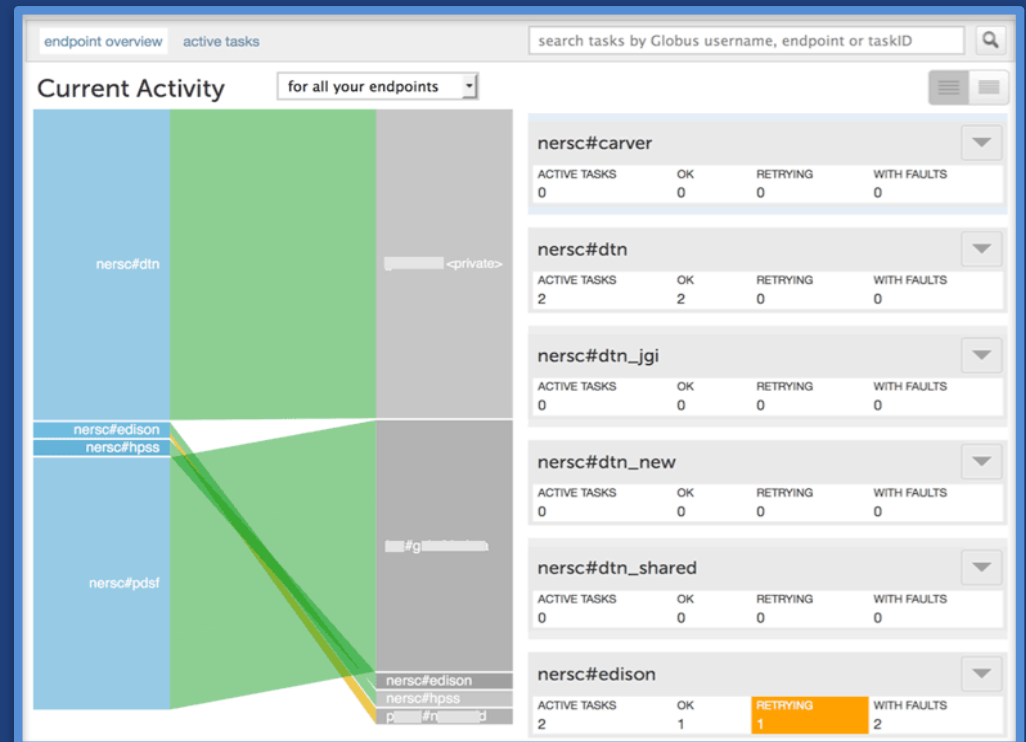

- Shared endpoints
- Data publication
- HTTPS support\*
- Management console
- Usage reporting
- Priority support
- Application integration

- **Branded Web Site**

- **Premium Storage Connectors**

- Amazon S3, Ceph, HPSS, Spectra, Google Drive\*, ...

- **Alternate Identity Provider (InCommon is standard)**

\*Available in early 2017

# New pricing model

## Globus Subscriptions

Globus file transfer is free to use for non-profit research and educational purposes. Subscriptions offer researchers access to enhanced features such as file sharing and data publication, and provide system administrators with a comprehensive view into how storage systems are being utilized. Your subscription helps us make Globus self-sustaining so we can continue to offer high-quality data management infrastructure to all researchers.

# Learn more on the GlobusWorld Tour

**Welcome to the GlobusWorld Tour!**

We're presenting a series of Globus tutorials and developer workshops across the US, building on the success of the [workshop held at GlobusWorld 2016](#). These workshops are made possible by the various hosting institutions that generously provide meeting space and other financial support.

The following workshops are currently scheduled:

- **September 13-14, 2016 - LBNL, Berkeley, CA**
- **October 12-13, 2016 - Yale University, New Haven, CT**
- **October 25-26, 2016 - NCAR, Boulder, CO**
- **Dates TBD - NIH, Washington D.C.**

**Why Attend?**

- Learn how the Globus platform simplifies development of web applications for researchers
- Experiment with new Globus services and APIs
- Exchange ideas with peers on ways to apply Globus technologies
- Expand your knowledge of Globus administration features

- [www.globusworld.org/tour/](http://www.globusworld.org/tour/)
- **Webinar: October 6<sup>th</sup>, 1pm CDT**
- **SC16: Full-day developer tutorial (Booth #436)**
